Burpee's Spring Flowering Bulbs

Soon it will be fall—the time to plant Tulips, Hyacinths, Daffodils, Crocus for blooming in your garden next spring. When we consider how easily they may be grown and how welcome are their gay colors and varied forms at a time of the year when flowers are scarce, it is no wonder that more and more bulbs are planted each fall for spring and winter blooming. We offer an extra select assortment. Quality is of the highest. Satisfaction is guaranteed under the Burpee Money Back Guarantee.

Tulips, Daffodils and Hyacinths are ideal for bold displays in solid beds and borders, in groups of ten or more here and there among perennials, in front of shrubbery, or in odd nooks and corners. You do not need a garden to enjoy the early color so easily obtained from spring flowering bulbs. Plant them anywhere to beautify your grounds.

Snowdrops, Chionodoxa, Crocus, Scillas, etc. are especially lovely in borders, rock gardens, under trees or in the lawn. Their appearance is a sign that spring is here again.

In addition to outdoor planting, many Fall Bulbs are ideal, easily grown subjects for winter blooming in the house.

HOW TO GROW TULIPS

Outdoors: Tulips should not be planted in soil in which they had been grown the last two seasons. Select a new location in a sunny position. Do not use fresh manure at planting time; well-rotted manure or bone meal may be worked into the soil which should be well drained. Plant bulbs 5 to 6 in. deep and 6 to 8 in. apart.

Indoors: A mixture of $\frac{3}{4}$ good clean garden soil and $\frac{1}{4}$ leaf mold to which a little bone meal has been added will give the best results. A 6-inch pot will hold about 6 bulbs. Place bulbs about 1 in. apart each way. Cover with an inch of soil and water thoroughly; then put pots in a coldframe or heel-in in the garden for 8 to 10 weeks to force root development. Bring pots indoors, first in a cool location and gradually to the average living room temperature.

Chinese Lantern Tulip, Good Gracious

Giant Breeder Tulips—May Flowering

Enormous blooms in colors not found in other classes of tulips

Breeder Tulips are of the same tall, stately growth as the Darwins, require the same culture, bloom at about the same time (during the month of May), but come in colors not usually found in that or any other class of tulips. Their rich and unusual blendings of purple and old gold, bronze and terra cotta, brown and violet, buff and maroon, are most attractive. These so-called "art shades" put Breeders in a class by themselves. Enormous, graceful, showy blooms, many of them sweet-scented. All are splendid for cutting and should be included in every garden with the more showy colors of the Darwin and Cottage classes.

The beauty of your garden next spring

Next spring's color depends on what you plant this fall—material available is wide and varied. Tulips, Daffodils and Hyacinths are ideal for bold displays in solid beds or borders, or in groups of a few dozen here and there among perennials, in the front of shrubbery, or in odd nooks and corners. Chinese Lantern Tulip

Glow with an iridescent sheen like a lighted Chinese Lantern

7561 Good Gracious This tulip is so distinct that instead of listing it with the Cottage or May Flowering group we are offering it separately so it will not be overlooked. Flowers are of good size, globular and glow with such an iridescent sheen as to create the effect of a delicately colored, lighted Chinese Lantern. The color is rather difficult to describe: a glorious combination of pink, salmon, orange and yellow gives the general effect of brilliant orange; inside is a brighter orange with a contrasting yellow base. Superb for any planting and valuable for cutting. 25 in. 5 for \$1.00; 10 for \$1.90; 25 for \$4.50; 50 for \$8.75

Chameleon Tulip

Color changes from day to day

7560 Pink Wonder In shape and habit of growth, it resembles the Darwins, but the coloring reminds you of the Cottage Tulips. Rather than list it with either class, we are keeping it separate so you will not miss it. When first opening, the flowers are white with faint red or pink markings on edges of petals. As flowers age the pink or red suffuses over entire surface so that the coloring changes from day to day, hence the appropriate name "Chameleon." Its ever-changing coloring is a constant delight and creates a lovely effect in the garden or as cut flowers. Flowers in May outdoors; blooms can be forced indoors in February. 5 for \$1.00; 10 for \$1.90; 25 for \$4.50; 50 for \$8.75

Average heights, color, and blooming season are given in the descriptions, but it is understood that weather conditions, climate, soil, etc., may cause some variation in different localities.

Orchid-like Dutch Iris, Bulbous

The graceful flowers in June are most popular for cutting

A glorious display of orchid-like, graceful flowers may be had in June if you plant bulbs of these beautiful iris in the fall in well-drained, sandy loam, 3 to 4 in. deep and 6 in. apart. In cold climates, mulch ground well after it is frozen. If planted too early the bulbs will produce top growth in late fall. Beautiful in the garden if planted among foliage plants. Highly prized for cutting and last a long time when put in water. Valuable for greenhouse forcing. In Florida, any of the Gulf States, Texas or New Mexico, bulbs planted in late fall produce winter flowers. 18 to 24 in.

In the descriptions we refer to standards and falls—the standards are the inner, erect segments; the falls are the outer, reflexed segments.

7626 Imperator Broad deep blue standards blotched golden yellow; soft blue falls. Our most popular blue iris that combines so well with lovely White Superior. 10 for \$1.00; 25 for \$2.25; 50 for \$4.25

7621 Blue Sea Cornflower-blue standards; falls lighter blue with large yellow blotches. Largest flowered of our bulbous Dutch Iris and highly prized for cutting. 10 for \$1.00; 25 for \$2.25; 50 for \$4.25

7623 Bronze Queen Deep lavender-violet standards; falls bronze blotched bright orange. An attractive iris on long, stiff stems for cutting. 10 for \$1.00; 25 for \$2.25; 50 for \$4.25

7624 Golden Emperor Deep golden yellow throughout both the standards and falls. A beautiful and lovely iris for all purposes. 10 for \$1.20; 25 for \$2.75; 50 for \$5.25

7625 Golden Harvest Attractive buttercup-yellow standards and falls. Makes a magnificent show by itself or grouped with others. 10 for \$1.00; 25 for \$2.25; 50 for \$4.25

7630 White Superior Uniform pure white with a thin sulphur-yellow line on the falls. Especially nice with other colors. Robust grower. 10 for \$1.20; 25 for \$2.75; 50 for \$5.25

Showy Anemone coronaria

7645 St. Brigid A choice mixture of semi-double and double blooms in a wonderful array of rich colors, such as blue, rose, scarlet, white, etc.; some are selfs, others of more than one color, many zoned. Neat, compact plants with long, stiff stems. Bloom in May and June. Plant bulbs 3 in. deep and 6 in. apart in a cool, moist, but well-drained soil. Require winter protection north of Washington, D. C. In northern states, or in any cold section, we do not advise outdoor fall planting; it is better to wait until spring and treat as annuals or dig and store roots over the winter. In southern states, fall planting is best. Anemone are fine for pot culture, borders and rock gardens, and ideal for cutting. 1 ft. 10 for \$1.00; 25 for \$2.25; 50 for \$4.25

Tecolote Giant Ranunculus

7653 Special Blend Giant double and semi-double flowers, 3 in. and more across, are freely borne on strong stems, 12 to 15 in. long. Our mixture contains a wonderful range of colors—yellows, from straw to deep golden yellow; all shades of red; orange; pink; many ringed and tipped with a deeper color. Do best in a shady location and in moderately rich soil. Fine for cutting. Not reliably hardy north of Washington, D. C., except in warm, sheltered locations. Splendid for growing in frames or pots. Set roots, claws downward, 2 in. deep, 4 to 6 in. apart. If grown in pots, plant 6 to 8 roots in a 6-in. pot, 2 in. apart. Cover roots with 1 in. of soil. 10 for \$1.00; 25 for \$2.25; 50 for \$4.25

Hardy Amaryllis *Lycoris squamigera*

7648 Halli Leaves produced in early spring ripen and disappear in June or July. About a month later, as if by magic, stalks 2 to 3 ft. tall appear crowned with a whorl of 8 to 12 lavender-pink, lily-like flowers. Because of its unique habit of growth, it is often referred to as the Magic or Mystery Lily. For outdoor planting only. Nice for cutting. Hardy amaryllis do well in any good, well-drained garden soil, in a sunny location. Plant bulbs not less than 10 in. apart outdoors and cover them firmly with 5 in. of soil. 50¢ each; 5 for \$2.25; 10 for \$4.25

Miniature Narcissus or Daffodils

Wonderful for rock gardens, naturalizing, borders or pots

Clusters of these dainty, small-flowered daffodils are most charming in the garden and highly prized for indoor decoration. They are delicately beautiful and of exceptional substance, growing 6 to 12 in. tall depending on variety.

Paper White & "Yellow Paper White" Polyanthus Narcissus

Popular for growing in the house

One of the easiest flowers to grow. To have a continuous display, make successive plantings two or three weeks apart. We suggest you order enough bulbs early as they will keep in perfect condition if put in a cool, dry place until needed for planting. After flowering, the bulbs should be discarded and new ones purchased next fall. Ours are large, firm bulbs that give best results.

Water Culture: Put an inch or two of sand or pebbles in bottom of dish; set the bulbs upright and place sufficient pebbles around them to hold them in place. Fill dish with water and set in a dark, cool room until plenty of roots have formed, after which bring to a light but cool, free from frost, place. May also be grown in soil. **They are not suited to garden planting** except in frostless localities.

7187 Paper White Grandiflora

The large, pure white, sweet-scented blooms are borne in clusters and are highly prized for their beauty, fragrance, and the ease with which they can be grown. Popular indoors during winter. 5 for 85¢; 10 for \$1.60; 25 for \$3.75; 50 for \$7.25

7188 Soleil d'Or—Golden Yellow Narcissus

Often called the "Yellow Paper White," the sweet-scented blooms being rich golden yellow with a deep orange-red cup. Do best grown in soil. Full cultural directions are on each bag. 5 for \$1.00; 10 for \$1.90; 25 for \$4.50; 50 for \$8.75

Average heights, colors and blooming season are given in the descriptions, but it is understood that weather conditions, season, climate, soil, etc., may cause some variation in different localities. The blooming time given will show the relative time when different varieties flower.

Jonquils and Campernelles

Lovely for Borders, Rock Gardens, Naturalizing, Pots and Cutting

Jonquils and their hybrids are a distinctive type of narcissus; the Single Jonquil and the Campernelle flowers are small, delightfully scented, and usually borne in clusters of two or more. Jonquil hybrids are larger flowered. All are perfectly hardy; valuable for indoor culture. Ideal for cutting as the flowers keep for a long time. They deserve to be grown extensively and are increasingly popular.

7153 Single Jonquil The true, old-fashioned jonquil with the fragrance of the honey locust. Each stem carries a cluster of 3 to 8 small golden yellow flowers. 5 for 70¢; 10 for \$1.30; 25 for \$3.00; 50 for \$5.75

7154 Golden Sceptre Flowers are deep jonquil-yellow, 3 in. or so across. The perianth is star-shaped, just a shade lighter in color than the trumpet, which is slightly rolled and flaring at the brim. A tall, sweetly scented jonquil hybrid. 5 for \$1.00; 10 for \$1.90; 25 for \$4.50; 50 for \$8.75

7156 Giganteus Campernelle Largest flowering of all campernelles. The rich, deep yellow, delightfully fragrant flowers are borne freely in clusters of from 2 to 5. Crown is broadly fluted at margin. Very long lasting. Lovely in every way. 5 for 75¢; 10 for \$1.40; 25 for \$3.25; 50 for \$6.25

Medium Trumpet Daffodils

Medium Trumpet, the Incomparable Daffodils, are well named. They are most showy, truly spectacular. Trumpets vary in size and shape according to variety. Where trumpet is greatly reduced in size and cupped, we refer to it as a "cup" and where it is shortened but expanded we call it a "crown." The trumpet is the funnel-like center, the perianth the surrounding row of petals. Trumpets, crowns or cups of many varieties are strikingly edged in varied shades of orange from light to brightest scarlet-orange and measure from one-third to a little less than the length of the perianth. The colors are brightest when flowers are grown in semi-shade. Some gardeners refer to them as Long Cupped Daffodils.

Dick Wellband Daffodil

Fortune Daffodil

Pink Fancy Daffodil

Medium Trumpet Incomparable Daffodils

Incomparable Daffodils are a group of truly beautiful, spectacular daffodils whose trumpets are not so long as the surrounding perianth petals. Trumpets are of different shapes and sizes as pictured above. A shortened, broadened trumpet is described as a "crown" as in the Dick Wellband Daffodil, top left.

The center flower is Fortune, with a large, half long, flaring trumpet. Where the trumpet is small and flattened, we call it a "cup." Pink Fancy, top right, is a good example of such an exquisitely cupped daffodil, pink edged copper. The Incomparable Daffodils are ideal for your garden. Their flower shapes and colors are interesting and artistic.

Burpee Daffodil Bulbs are Top Size Round and of the Highest Quality.

Beautify your early spring garden with Daffodils. Plant them in beds, borders, among perennials, in front of shrubs, open woodlands, meadows, or in shady nooks; they do well everywhere and will live for years.

HOW TO GROW DAFFODILS

Outdoors: For best results plant bulbs as early in the fall as possible, 4 to 8 in. deep and 6 to 10 in. apart; the exact distances depend on the size of the bulb and the nature of the soil. In very cold locations, after the ground is frozen hard, cover with leaves, straw or coarse litter to a depth of 4 to 6 in. to prevent alternate freezings and thaws during the late fall and winter months.

Indoors: Put several bulbs, about 1 in. apart (same variety) in a pot, barely cover the bulbs with soil, water thoroughly and put in coldframe or heel-in in the garden for 8 to 10 weeks to force root development before bringing indoors for winter blooming. Full cultural directions for outdoors and indoors are sent with every order.

Burpee's Early Dutch Crocus

Bloom in March and will grow in many places—in the lawn, flower borders, rock gardens, edge of shrubs, on the slopes of terraces, in sun or shade, and even under trees. For showy effect, plant bulbs 3 to 4 in. apart, 2 in. deep. To avoid formal arrangements when planting in the lawn scatter the bulbs and plant them where they fall. In borders, double rows 6 in. apart with the bulbs spaced 3 in. apart in each row are very showy. Well-drained, fairly rich soil gives best results.

Indoors, plant 8 to 10 bulbs 1 in. deep, 2 in. apart, in a 6-in. container using light sandy soil. Make several plantings for longer bloom. Complete instructions sent with every order.

Candidum or Madonna Lily

Burpee's Hardy Garden Lilies

Magnificent blooms in variety of colors from June through September

Easy to grow in any good, well-drained garden loam to which has been added a generous quantity of leaf mold. Once established, they will increase in beauty each year. Most all lilies delight in a sunny location, but mulch so that the hot sun does not reach the soil around the base of the plant.

All varieties offered are highly decorative in the garden border, while the dwarfier ones also give a charming touch of beauty to the rock garden. Lily bulbs differ greatly in size according to variety, some 1 in. across, others 3 in. or more; we supply the sizes which will give the best results. We do not recommend hardy lily bulbs for house culture; for this purpose, we suggest you plant the Croft Easter Lilies offered on the opposite page which also may be grown successfully outdoors in sections of the country where the winters are mild.

CANDIDUM (Madonna or St. Joseph's Lily)

Waxy white, sweet-scented, and broadly funnel-shaped flowers with yellow anthers are freely produced during June and early July atop strong stems 2 to 4 ft. tall. Individual flowers measure 3 to 4 in. long and fully as wide. In addition to being known as Madonna or St. Joseph's Lily, it is also known as Annunciation, Lent or Bourbon Lily. Very popular lily and it is most easily grown. It likes a location with full sun, but will endure light shade.

7243 EXTRA LARGE BULBS These will produce taller plants with larger blooms, and more of them to a stem, the first year after planting than the large bulbs. Give best results.
50¢ each; 5 for \$2.25; 10 for \$4.25; 25 for \$10.00

7244 LARGE BULBS Several large, delightfully fragrant flowers per stem are produced the first year; more blooms the next. This size is preferred by many for the most spikes at low cost.
40¢ each; 5 for \$1.85; 10 for \$3.25; 25 for \$7.25

Speciosum rubrum Lily

7252 Speciosum album (White Show Lily) Large white blooms with golden green markings in throat, the frilly edged petals being attractively rolled back while the stamens and pistil curl out for quite a distance from the flower itself. A graceful, free flowering lily that blooms during August and September and grows 3 ft. and more tall. Beautiful alone or with the others, combining especially well with Speciosum rubrum, an excellent companion flower which is pictured at center left.
75¢ each; 5 for \$3.50; 10 for \$6.50; 25 for \$15.50

7253 Speciosum rubrum (Show Lily) Beautiful white flowers suffused rose-pink and spotted crimson. The petals are gracefully reflexed. Blooms in August and September with four to ten flowers per stem; well established plants often have more. A universal garden favorite; lovely for cutting. Especially nice combined with Speciosum album. 3 to 4 ft. tall.
60¢ each; 5 for \$2.75; 10 for \$5.00; 25 for \$12.00

7246 Centifolium hybrids Very large, white, funnel-shaped, fragrant flowers, the outside varying from emerald-green through tints of pink to brownish purple. These gorgeously colored hybrids bloom in July and August and when well established grow up to 6 ft. in height. Prefer partial shade.
50¢ each; 5 for \$2.25; 10 for \$4.25; 25 for \$10.00

7247 Henryi (Orange Show Lily) Brilliant salmon-orange flowers with reddish brown spots and a green central line in each petal. Blooms late July and August. Also called Orange Speciosum Lily as the petals reflex gracefully. Grows 4 to 6 ft. and more tall when established.
50¢ each; 5 for \$2.25; 10 for \$4.25; 25 for \$10.00

NOTE: DELIVERY OF HARDY GARDEN LILY BULBS

Hardy Garden Lilies are sent you in the fall just as soon as they are thoroughly cured and in the proper condition for planting. Some varieties will not be ready until November or early December. Plant them in the garden as soon as possible after they are received. If you live in a locality where the soil freezes early, we suggest that you cover the ground with manure, leaves, straw, etc., to prevent it from freezing. When lily bulbs arrive, remove covering and plant them immediately. Do not put the covering back over the bulbs until after the ground has frozen hard. The purpose of the covering is to keep the ground frozen so that alternate freezings and thawings will not injure root growth during the winter. Remove covering in spring after danger of frost.

CROFT EASTER LILIES

For Indoor Winter Flowering

Very large, purest waxy white, long, trumpet-shaped flowers of most wonderful texture. If cut when partially open, blooms can be kept for two weeks. Plants are strong growing and prolific bloomers, the flowers having a most pleasing fragrance. Stem is short, making it an ideal pot plant. Use a 5- or 6-in. pot; place bulb loosely in rich, porous soil so that it is barely covered and the soil gently but firmly set. Keep in a cool, dark but airy place, free from frost, until bulbs are well rooted; afterward bring to the light and grow on in a temperature of not more than 60° F. Ideal garden subject in frost-free locations. In other sections, after blooming in the house, they may be planted outdoors where they will provide late summer bloom.

Burpee's Lawn Grass Seed for Fall Sowing

The best time to start your lawn, or to repair it, is during the cool weather of early fall. At this time the weather is favorable for the development of domestic grass but unfavorable for most weeds and wild annual grasses. Why not plan now to have a luxuriant lawn that will add so much to the beauty of your home? For new lawns, sow 1 lb. of grass seed to 200 sq. ft.; 100 to 150 lbs. per acre. To improve old lawns, half these quantities should be sufficient. MERION Kentucky Bluegrass goes farther—1 lb. will sow 500 to 750 sq. ft. of new lawn.

4914 Fordhook Finest This blend is especially prepared from the highest quality seeds that can be produced. It makes a smooth, thick, green, velvety lawn with a thick bottom, free from clumps. Only the very best fine-leaved and deep-rooted varieties of the most suitable grasses for making an even, thick mass of sod are used. Sure to produce the best results under average conditions of soil and climate.
